

LSBAH003 PREMIUM POLYURETHANE BREATHING AIR HOSE

The Luno Systems Polyurethane breathing air hose is designed for work in high risk working such as tank cleaning, where there are highly contaminated environments. Enhanced chemical and heat resistance with good flexibility at all temperatures are all features which make this a premium level breathing air hose. The hose is used on luno life support systems, where breathing hose integrity is especially critical.

Specification	
Lengths	10, 25, 50 or 100 Metre
EN standard conformity	EN14593-1, EN14594
Material / Construction	Polyurethane, braided reinforced
Chemical resistance	Most fuels, oils greases, solvents (see chemical resistance data)
Size	14mm external, 8mm bore
Flexibility	High
Minimum bend radius	130 mm
Nominal weight	100g/ m
Operating temperature	-20 to +60 deg C
Colour	Orange (other colours on request)
Terminations	Luno stainless barbed tail and ferule with CEJN Breathing couplings
Antistatic properties	Yes

Order information

LSBAH003 – XXM (X indicates length in metres)
